

Two calendars for the same past

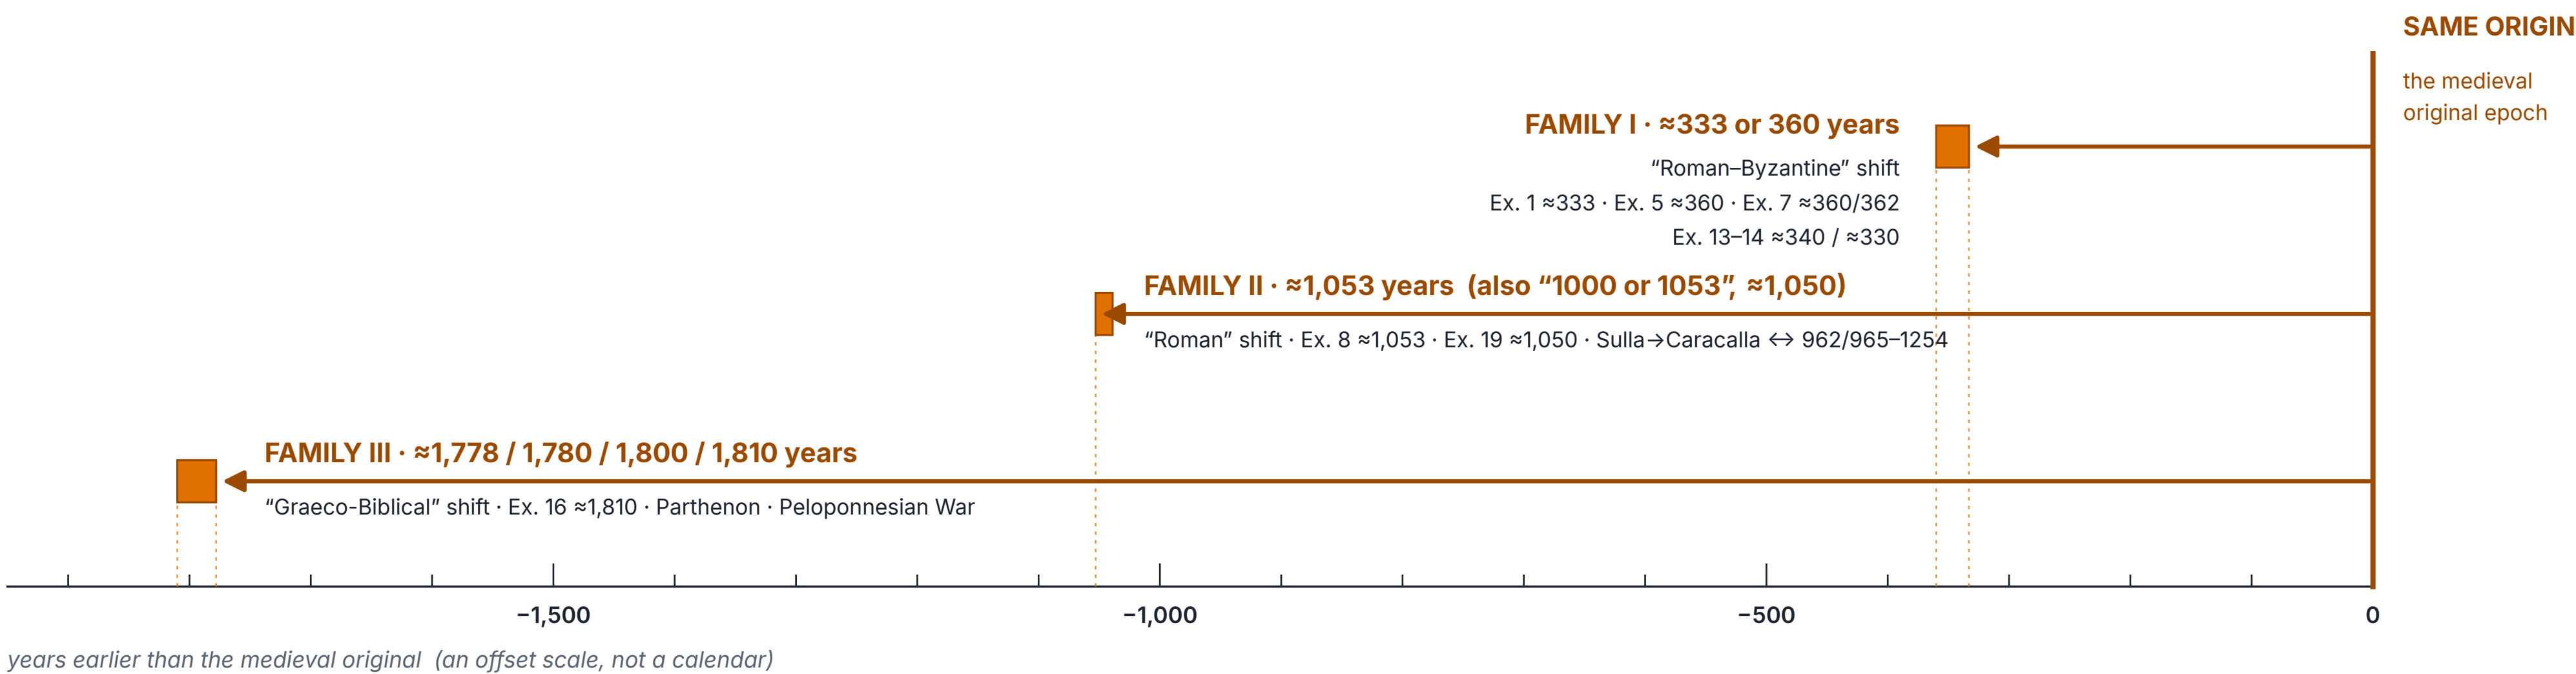

Accepted historical chronology compared with the “New Chronology” proposed by A. T. Fomenko and G. V. Nosovsky

One continuous calendar axis, c. 3100 BCE → 2026 CE. The calendar has no year 0: 1 BCE is followed directly by 1 CE. Orange marks show the authors’ proposal as they publish it; they are not accepted findings.

How the proposed shifts work

Three principal duplicate–offset families. Each one is an alternative distance measured from the SAME medieval original — they are not consecutive amounts to be added together.

Read the shifts as alternatives

Chron1 ch.6 §7: chronicles S2, S3, S4 are copies of S1 shifted
"by 333, 1053, and 1778 years accordingly ... All the three shifts are counted off the same point."

- ✓ copy = original – 333/360 or original – 1,053
or original – 1,778..1,810
- ✗ 333 + 1,053 + 1,778 = 3,164 — not a shift they propose.
There is also no universal 600-year correction.

Gaps between two copies (rather than from the origin) can equal differences or sums: Fig. 6.20 labels Ex. 6 "720 = 1053 – 333"; Table 2 calls Ex. 2s ≈1,300 "the sum of two basic shifts".

The 20 duplicate–dynasty examples of Chron1, chapter 6

Shifts are reproduced exactly as printed (text, tables, figure captions and figure annotations). Disagreements between printed values, and examples with no fixed offset, are kept as they are. All bar dates below are the conventional dates the authors cite for each dynasty.

#	FIGURES	DYNASTY / EPOCH a (as printed)	DYNASTY / EPOCH b (as printed)	CONVENTIONAL DATES (1300 BCE → 1700 CE)	SHIFT AS PRINTED	NOTES · inconsistencies / missing offsets
1	6.11–6.12a	a Second Roman Empire (Sulla → Caracalla), 82 BC–217 AD	b Third Roman Empire (Aurelian → Theodoric), 270–526 AD		≈333 (text, Table 1) ≈330–360 (Fig. 6.12 caption)	Text and caption give different values.
2	6.13–6.14	a Kings of Israel (Bible), 922–724 BC	b Third Roman Empire jet, 300–476 AD		≈1,300 (Table 2)	Not a basic value: Table 2 calls it the sum of ≈1000 and ≈300.
3	6.13, 6.15	a Kings of Judah (Bible), 928–587 BC	b Eastern Roman Empire jet, 300–552 AD		— none printed	No fixed offset in text, table or captions.
4	6.16	a Popes of Rome, 140–314 AD	b Popes of Rome, 324–532 AD		— none printed	No offset given; text says it conforms to Ex. 1.
5	6.17–6.18	a Carolingian Empire, 681–887 AD (captions: 681–888)	b Eastern Roman Empire jet, 324–527 AD		≈360 (Fig. 6.18) mean reign shift 359.6 (fig.)	End year printed as 887 (text) and 888 (captions).
6	6.19–6.20	a Holy Roman Empire, 983–1266 AD	b Roman Empire jet, 270–553 AD		≈720 (text, Fig. 6.20) mean 723 (fig.)	Fig. 6.20: "720 = 1053 – 333" — a gap between two copies.
7	6.21–6.22	a Holy Roman Empire, 911–1254 AD	b Habsburg empire, 1273–1637 AD		≈362 (text) · ≈360 (captions) mean reign–end 373 (fig.)	Three different printed values for one pair.
8	6.23–6.24	a Holy Roman Empire, 936–1273 AD	b Second Roman Empire, 82 BC–217 AD		≈1,053 (Fig. 6.24) mean reign–end 1,039 (fig.)	Per-ruler differences in Fig. 6.24 run 1,015–1,057.
9	6.25–6.26	a Kings of Judah (Bible), 928–587 BC	b Holy Roman Empire (German reigns), 911–1307 AD		≈1,830 (Fig. 6.26) 1,839 (Fig. 6.31)	"911 AD = 928 BC" is 1,838 yrs counted without a year 0.
10	6.27–6.28	a Kings of Israel (Bible), 922–724 BC	b Roman coronations of German emperors, 920–1170 AD		≈1,840 (Fig. 6.28) "920 + 922 = 1842" (fig.)	Figure counts from a table "year zero" of 920 BC.
11	6.29–6.30	a Russian czar-khans, 1276–1600 AD	b Habsburg empire, 1273–1600 AD		0 — "no chronological shift"	Same-period identification (details in Chron7).
12	6.31	a Armenian Catholicoses (Fig. 6.31: from 970 AD)	b Holy Roman Empire X–XIII c. (from 911) + kings of Judah		60 and 1,839 (Fig. 6.31 only)	"970 AD = 911 AD ... 60 year shift" (arithmetic: 59).
13	6.32	a First Byzantine Empire, 527–829 AD	b Second Byzantine Empire, 829–1204 AD		≈340 (Figs 6.32, 6.34–6.36)	
14	6.33–6.36	a Second Byzantine Empire, 867–1143 AD	b Third Byzantine Empire, 1204–1453 AD		≈330 (Figs 6.33–6.36)	Byzantium II is 829–1204 in Ex. 13 but 867–1143 here.
15	6.37–6.39	a Russian history, 945–1174 AD	b Russian history, 1363–1598 AD		410 (Figs 6.37–6.39)	
16	6.40–6.41	a "Ancient" Greece, 510–300 BC	b Medieval Greece, 1250–1460 AD		≈1,810 (Figs 6.40–6.41)	
17	6.42–6.48	a England, 640–1330 AD	b Byzantium, 380–1453 AD		text: 210–270 fwd, 100–120 back Figs 6.47 / 6.48: ≈275 / ≈120	Fig. 6.47s ≈275 lies outside the text's 210–270.
18	6.49–6.50	a Greek kings 1182–1070 BC; Lacedaemon 491–330 BC	b Byzantium 1341–1453 AD; despots of Mistras 1348–1460		— none printed	Reign matches only (equal 112-yr spans). Fig. 6.50 prints one reign as "330–397" BC.
19	6.51–6.52	a Regal Rome of Livy (7 kings)	b Third Roman Empire jet, 300–552 AD		≈1,050 (Fig. 6.52)	c = 10 ^{–4} . Ch. 6 prints no BC dates; dashed bar = conventional 753–509 BC.
20	6.52a	a Regal Rome of Livy	b Holy Roman Empire + Byzantium (both X–XIII c.)		— none printed	Figure aligns Livy's years-from-Rome's-founding with years AD.

dark blue = a · mid blue = b · dashed = date not printed in ch.6 · orange line = the authors' claimed identification
